Email	thaihoangbao181003@gmail.com

EDUCATION

PERIOD	SCHOOL	MAJOR	GPA
2021.08 - NOW	Duy Tan University	Computer Science	3.03/4.00

PROJECT

PERIOD	DESCRIPTION
2024.07	<p>Snack shop website (http://thaihoangbaotiemmanvat.runasp.net/)</p> <p>This project uses MS SQL and ASP.NET Core to create an online ordering platform for snacks from a restaurant's menu. It comes with an admin interface where managers may create, edit, and remove discount codes in addition to adding, updating, and removing food items from the menu. Customers and administrators can interact seamlessly as they peruse the menu, choose their items, and submit their orders, which are forwarded to the administrator for processing.</p>
2024.09	<p>Hotel management application</p> <p>This project is a straightforward MS SQL and Java hotel administration application. While the customer can look for available rooms and continue with the rental process, the server is in charge of maintaining the hotel rooms. The application maintains effective communication between the client and server by managing and storing room details in an MS SQL database.</p>
